Ability Scores

Strength: physicality, brawn, toughness, endurance
Dexterity: readiness, grace, precision, subtlety
Control: willpower, charm, weird, emotion

Hit Protection (HP)

Ability to avoid serious harm (both physical and Stress).

Inventory

You have 10 Inventory Slots. Most items take up one Slot. Bulky items take 2 Slots

Fatigued

A penalty that takes up one inventory slot and lasts until you can recuperate. Each Fatigue slot requires its own recuperation.

Saves

The Facilitator (GM) may call for a Save with one of your Ability Scores as the target. A Save represents a risky actions you've chosen or an attempt to avoid harm. Roll a d20 and compare the result to your Ability Score. A result equal to or under succeeds.

Actions

On your turn, you may move 40 feet and take a single action.

Initiative

Perform a Dexterity Save to determine if you act on the first round. All subsequent rounds investigators act first.

Combat

All attacks auto-hit under reasonable circumstances. Attackers roll Damage or Stress die, subtract Armor (damage) or Stability (Stress), and deal the remaining total to the target's HP.

Armor & Stability

Armor reduces incoming damage. Stability reduces incoming Stress. Any unblocked amount of either is deducted from your HP.

Damage & Wounds

Damage that exceeds HP is deducted from Strength. Upon losing Strength, make a Strength Save or suffer a Wound.

Stress & Fallout

Stress that exceeds HP is deducted from Control. Upon losing Control, make a Control Save or suffer a Fallout.

Modify

- Impaired attacks use a d4
 - Enhanced attacks use a d12
 - Unarmed attacks are always Impaired
 - If each hand has a weapon, roll both!
- Only use the higher result

Healing

A quick rest in a safe spot fully restores HP

Advice for Players

- Keep in mind there's no perception ability!
- You're playing a regular person, rolls are dangerous. Clever plans don't need to roll
- Collaborate, communicate, and help everyone else to tell their story.
